Choosing the Right Wheel

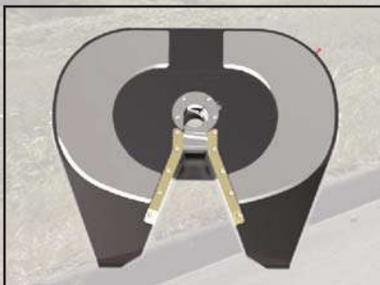

JSK37U Series

The JSK37U series is a cast ductile iron topplate. This is the original locking mechanism that all other wheels are based from. It features a cushion ring or steel wear ring, anti-high coupling lugs, infinite adjustment, a double lock and requires only 60 lbs of pull force to open. This wheel can also be rebuilt on the truck. These features are included on all other JOST wheels.

JSK36N Series

This JSK36N series is a stamped steel fifth wheel. This lightweight, economical OEM entry level wheel can be rebuilt on the truck and is a perfect option for owners with a short trade cycle. This wheel is interchangeable with all JSK37U series fifth wheels.

JSK37Y Series

The JSK37Y series is designed for terminal tractor applications. All of the wear areas are replaceable allowing the wheel to last longer. This wheel can also be used as an aftermarket replacement for the competitors FW35-03344 series fifth wheel.

JSK37H & JSK37F Aftermarket Replacement Topplates

JOST International offers models to replace older competitive designs. These topplates include all the same features as the JSK37U series.

The JOST JSK37H series replaces:

- | | |
|---------------|---------------|
| FW 8 Series | FW2535 Series |
| FW17 Series | FW35 Series |
| FW2000 Series | FW3105 Series |
| FW2500 Series | |

The JOST JSK37F series replaces:

- | | |
|-------------|---------------|
| 5000 Series | 5092 Series |
| 6000 Series | H 5092 Series |
| 7000 Series | |

Locking Mechanism

All JOST wheels feature our safe and simple locking mechanism with only four moving parts.
